# Krabi

amazing  
**THAILAND**  
Amazing Value

**Krabi** province is an area of outstanding natural beauty. Classic virgin beaches fringed with towering limestone formations, is an understatement to describe this stunningly beautiful area of Thailand. The Krabi coastline is dotted with rarely visited tropical islands, palm fringed beaches, waterfalls, caves, and strange rock formations.

## Climate

Krabi has a tropical monsoon climate. It's warm all year 'round, but the two periods of April - May and September - October are the hottest. The September-October period is also the wettest. The best time to visit Krabi is during the cool Northeast monsoon season, from November through March, when it isn't so humid, and the cool breezes keep things comfortable.
